# Small and large pets

## Wound cleaning

Disinfecting wounds in animals is an important part of wound care and serves several purposes::

- Preventing infection
- Cleaning
- Breaking down biofilms and reducing the bacterial load in the wound.
- Reducing inflammatory reactions

**Pet Protection Cleansing Spray** based on chlorhexidine digluconate is available in large and small volumes and is used in veterinary medicine for cleaning and disinfecting wounds, in both pets and livestock.

**Chlorhexidine has antimicrobial properties** and can help kill or inhibit the growth of bacteria and other microorganisms that can cause infections. It can be used to clean the skin around the wound and to rinse or irrigate the wound itself.

The solution can be used to clean the wound by gently rinsing it

*Chlorhexidine is suitable for cleaning the surface of open wounds, but should not be inserted into deeper tissue layers, open cavities or body parts with direct access to the bloodstream (eyes, ears, nose, etc.). Avoid using chlorhexidine on chronic wounds.*

# Self-adhesive foam bandage

Wound care is an essential part of veterinary care.

The use of self-adhesive foam bandages can facilitate wound care in pets, provide stability and comfort, and contribute to faster recovery.

Foam bandages offer numerous advantages:

- Easy to apply
- Stability and fixation
- No pain on removal thanks to its self-adhesive property
- Can be used during and after surgical procedures
- Fixation of intravenous infusions

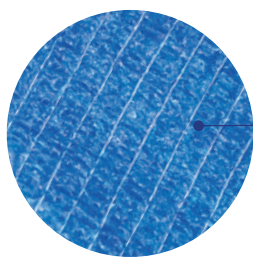

Pet Protection Foam Bandages are available in two sizes and two colours

| Ref     | EAN           | Description | Size       | Package | Carton |
|---------|---------------|-------------|------------|---------|--------|
| 5500.00 | 5407006145585 | Foam Blue   | 6cm x 4,5m | 6/pk    | 72/ct  |
| 5501.00 | 5407006145592 | Foam Blue   | 3cm x 4,5m | 12/pk   | 144/ct |
| 5510.00 | 5407006145608 | Foam Beige  | 6cm x 4,5m | 6/pk    | 72/ct  |
| 5511.00 | 5407006145615 | Foam Beige  | 3cm x 4,5m | 12/pk   | 144/ct |

# Cohesive bandages

The use of cohesive bandages provides a safe and effective way to fix dressings, protect wounds, support joints and prevent swelling.

- Fixation of dressings
- Protection of wounds

### Longitudinal fibers

- Extremely elastic
- Strengthen the bandage
- Provide desired tension and pressure
- Exceptional comfort

### Extreme flexibility

- Adapts to the shape of the body
- Preserves freedom of movement
- Reduces friction and irritation
- No restriction of blood circulation

- Self-adhesive
- Does not stick to fur or skin
- Joint support.
- Prevention of swelling

Pet Protection Cohesive Bandages are available in three sizes

| Ref     | EAN           | Description      | Size         | Package | Carton |
|---------|---------------|------------------|--------------|---------|--------|
| 9086.00 | 5407006141655 | Cohesive bandage | 2,5cm x 4,5m | 48/pk   | 288/ct |
| 9085.00 | 5407006141662 | Cohesive bandage | 5cm x 4,5m   | 24/pk   | 144/ct |
| 9087.00 | 5407006141679 | Cohesive bandage | 7,5cm x 4,5m | 16/pk   | 96/ct  |

# Cohesive bandages with compress

For moderate to severe wound exudation, a cohesive bandage with an embedded compress may be useful due to the absorbent capacity of the compress.

- Wound protection
- Easy application and fixation
- Simplified dressing change
- Cost-effective

Pet Protection Cohesive bandages with compress is available in two sizes

| Ref     | EAN           | Description               | Size     | Package | Carton |
|---------|---------------|---------------------------|----------|---------|--------|
| 9088.00 | 5407006143789 | Cohesive bandage with pad | 6cm x 2m | 12/pk   | 192/ct |
| 9089.00 | 5407006143796 | Cohesive bandage with pad | 8cm x 2m | 12/pk   | 144/ct |

# Livestock and farm animals

- HOOF AND CLAW PROBLEMS
- MASTITIS

## Cleaning and care

**Pet Protection Cleansing Spray based on chlorhexidine digluconate** can be used in the care of hooves and claws of animals. It can help clean and disinfect the hoof or claw and prevent or treat certain conditions

- **Disinfection of hoof and claw injuries:**  
Reduce bacterial load and prevent infection.
- **Treatment of hoof and claw problems:**  
Clear bacterial infections and promote healing.
- **Cleaning of hooves and claws:**  
General cleanser for the hoof or claw.

Pet Protection Cleansing Spray is available in two sizes

| Ref       | EAN           | Description     | Size  | Package | Carton |
|-----------|---------------|-----------------|-------|---------|--------|
| 1011PP.00 | 5407006145622 | Cleansing Spray | 50ml  | 20/pk   | 200/ct |
| 1017PP.00 | 5407006145639 | Cleansing Spray | 250ml | 36/pk   | 36/ct  |

*\*The use of chlorhexidine should always be combined with other appropriate veterinary treatments, such as trimming the hoof or claw and removing infected tissue. The correct application and dilution of chlorhexidine depends on the specific situation and the recommendations of a vet or a professional farrier. These professionals can assess the health of the hoof or claw, determine the nature of the problem and recommend the most appropriate treatment methods.*

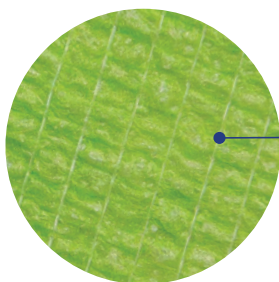

# Claw bandages

There are several common hoof and claw problems in animals, especially in ruminants such as cows, sheep, goats, horses, ponies and donkeys

The benefits of claw bandages:

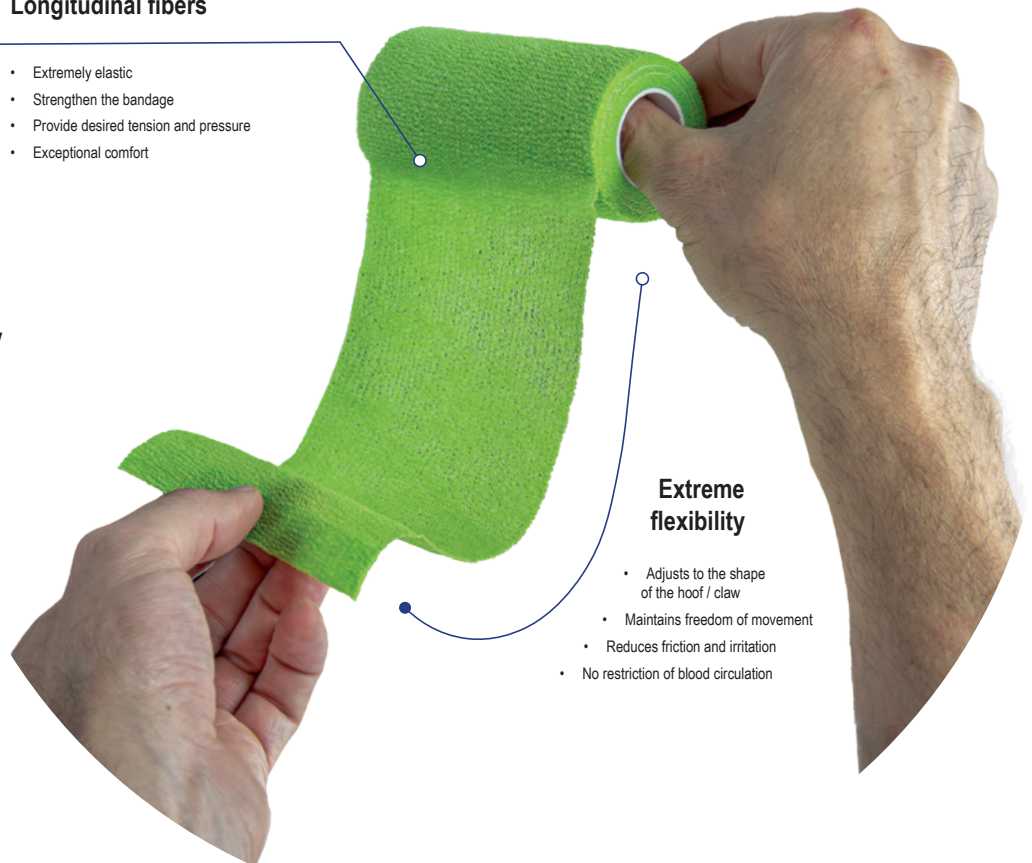

- Protection and support
- Promoting healing
- Pressure reduction

## Longitudinal fibers

- Extremely elastic
- Strengthen the bandage
- Provide desired tension and pressure
- Exceptional comfort

- Hygiene and protection
- Identification of treatments
- Recognisability and visibility

## Extreme flexibility

- Adjusts to the shape of the hoof / claw
- Maintains freedom of movement
- Reduces friction and irritation
- No restriction of blood circulation

Pet Protection Claw Bandage is available in 1 size and two colours

| Ref     | EAN           | Description            | Size        | Package | Carton |
|---------|---------------|------------------------|-------------|---------|--------|
| 9078.BL | 5407006145110 | Cohesive bandage Blue  | 10cm x 4,5m | 12/pk   | 144/ct |
| 9078.GR | 5407006145103 | Cohesive bandage Green | 10cm x 4,5m | 12/pk   | 144/ct |

# Teat bandage

The purpose of a teat dressing in case of Mastitis is to reduce inflammation, reduce swelling and promote healing. The bandage can also help relieve pain and speed up the recovery process. In addition, teat bandages can help the cow stand more comfortably and produce milk. The teat bandage has other important functions:

- **Protection and isolation from the environment**
- **Pressure distribution**, relieves pain and promotes recovery
- **Easy application thanks to the self-adhesive nature**

**Porous structure**

- Allows air and moisture to circulate around the wound
- Maintains optimal moisture levels
- Prevents moisture from being trapped
- Reduces risk of infection

**Absorbent capacity**

- Useful for moist wounds or wound exudation
- Absorbs excess
- Moisture prevents irritation of the wound

**Extreme flexibility**

- Adapts to the shape of the body
- Preserves freedom of movement
- Reduces friction and irritation
- No restriction of blood circulation

**Pet Protection Teat bandages** are available in two sizes and two colours
