Protectaplast®

ABOUT US

Protectaplast®, founded in 2002, is the sister brand of **Detectaplast®**

Being already on the market with its superior blue, detectable plasters, Detectaplast® felt an increased demand for the same high quality and superior adhesion in a skin colored version. To meet this demand, Protectaplast® was founded.

Thanks to years of experience in the industry and close contacts with our suppliers, we can meet the needs and demands of our consumers.

Because we continuously invest in the development of new products, we can offer the most complete range of wound care products.

We are a real plaster authority. Is it a cut, an abrasion, or a burn? In the finger, the fingertip, the knuckle, the heel, the nose, or in a difficult place? For each application and each place, we have a specific plaster. Thanks to the wide range of qualities (waterproof, elastic, invisible....) you are also assured of the most optimal care!

In addition to an extensive range of plasters, we also offer hygiene products, protective equipment and various first aid materials, such as first aid kits, creams, stretchers, disinfectant products, bandages, etc...

BLISTER PLASTER

Although blisters are small, they can cause a lot of trouble and be very painful. Due to the constant friction of your clothing, there is a good chance that your blister will burst, and then the risk of infection is extra high. Protectaplast® offers professional-quality blister plasters for optimal protection

8810
Mix 3 dimensions
6 pcs per box

HYDROGEL PLASTERS

The Detectaplast® Hydrogel plaster is suitable for small first degree abrasions and burns as well as for chronic wounds that do not heal well. The hydrogel contains 60% water, has a slight cooling effect and reduces pain. The plaster creates a moist wound environment for quicker healing. The PU-film allows the wound to breathe and obstructs bacteria. Not suitable for wounds with heavy discharge given its limited absorptive capacity.
